DIRECTIONS FOR USE

RESTRAINTS

DO NOT apply as a space spray.

DO NOT use to control fleas on animals.

DO NOT use in animal housing.

PEST	CRITICAL COMMENTS
Ants, Cockroaches, Silverfish, Spiders, Fleas, Indian meal moth and Red flour beetle	Apply onto surfaces and into cracks and crevices where insects may be harbouring, living and breeding for up to 3 months residual control. Apply as a surface application up to but not exceeding the point of run off. Use crack and crevice nozzle to direct spray into cracks, crevices and other hard to reach places. Live activity can be treated as a spot treatment. Carpets should have a small hidden area sprayed and checked for any discolouration before widespread use.
Bed Bugs	Apply directly onto bed bug activity as a spot treatment. DO NOT apply to mattress or bedding. An IPM approach should be followed for the control of bed bugs. For more information refer to the Code of Practice for the Control of Bed Bug Infestations in Australia.
Flies and Mosquitoes	Apply to surfaces where flies and/or mosquitos are likely to rest. For outdoor control, apply to surfaces where flies and/or mosquitos tend to be a nuisance.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

GENERAL INSTRUCTIONS

This product is ideally suited to be used with the Systems III Pressurised Dispenser unit. If using without System III, hold container upright whilst spraying. After use with the Systems III Pressurised Dispenser, ensure that the valve is closed and that the hose line is drained to avoid leaking.

FENDONA® Pressurised Insecticide is a fast-knockdown, residual insecticide that controls insects by contact action and ingestion. When applied as a surface spray, the product offers long residual activity. FENDONA® Pressurised Insecticide is of relatively low toxicity to humans and other animals and is suitable for use in domestic and public areas.

To obtain best results, all surfaces should be treated, especially cracks, crevices and infested areas. FENDONA® Pressurised Insecticide can be used to control insect pests in internal and external situations in and around domestic, commercial and public buildings: including food processing facilities, hospitals and schools. Spray from a distance of 20-30 cm directly onto insects or spray onto surfaces for residual protection as per the Directions for Use table. Apply FENDONA® Pressurised Insecticide to clean surfaces, free of dirt, dust, oils, grease and other residues. Surfaces should have a small hidden area sprayed and checked for any discoloration before widespread use.

RESISTANCE WARNING

GROUP 3A INSECTICIDE

For insecticide resistance management FENDONA® Pressurised Insecticide is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to FENDONA® Pressurised Insecticide and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals may eventually dominant the insect population if FENDONA® Pressurised Insecticide or other Group 3A insecticides are used repeatedly. The effectiveness of FENDONA® Pressurised Insecticide on resistant individuals can be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, BASF Australia Ltd accepts no liability for any losses which may result from the failure of FENDONA® Pressurised Insecticide to control resistant insects. FENDONA® Pressurised Insecticide may be subject to specific resistance management strategies. For further information, contact your local supplier or BASF Australia Ltd representative.

PRECAUTIONS

Keep out of reach of children.

DO NOT apply directly to food, food packaging or food contact surfaces.

DO NOT apply to mattress or bedding.

Before use – Cover or remove bird cages or fish tanks during spraying. Remove or cover all exposed foodstuffs, cover all dishes and utensils and places where food is prepared or stored.

After use – Thoroughly ventilate treated area. Clean up thoroughly before processing / serving resumes.

BEWARE: Deliberately sniffing or inhaling concentrated spray can be harmful or fatal.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish. DO NOT contaminate ponds, waterways or drains with product or used container.

STORAGE AND DISPOSAL

Keep in a cool place out of the sun. Do not puncture or incinerate can, even when empty. Recycle empty cans if a facility is available, or place used can in household rubbish.

SAFETY DIRECTIONS

Harmful if inhaled. May irritate the eyes and skin. Facial skin contact may cause temporary facial numbness. Avoid contact with eyes and skin. DO NOT inhale spray mist. Wear disposable gloves. Wash hands after use.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Telephone 13 11 26 Australia-wide; New Zealand 0800 764 766. If swallowed, DO NOT induce vomiting. Give a glass of water.

If sprayed on skin, wash thoroughly. If sprayed in mouth, rinse mouth with water.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet.
