

**GENERAL APPLICATIONS**

Under most conditions spray Pro-Film 904 at least one hour, during daylight, before an anticipated rain. Sunlight for this time period is needed for the protective film to set. Pro-Film 904 is compatible with most insecticides, fungicides & foliar fertilisers.

**DIRECTIONS FOR USE - All crops**

PURPOSE	RATE	CRITICAL COMMENTS
<b>AS A STICKER</b> To control the life of the pesticide by forming a sticky elastic film that encapsulates and holds the pesticide on the crop foliage.	300 mL/ha	Use up to the normal pesticide cut-off time.
<b>AS A SPREADER</b> Helps the pesticide spray spread out uniformly on hairy or waxy plant parts to get into cracks and crevices.	300 mL/ha	Use up to the normal pesticide cut-off time.
<b>AS AN EXTENDER</b> To extend the time between sprayings of some pesticides by up to 7 days*.	1.2 L/ha	<b>DO NOT apply Pro-Film within 30 days of harvest of food unless under specific spray applications.</b> <b>SPECIFIC APPLICATIONS CAUTION:</b> Pro-Film 904 can be used with Copper fungicides and tolerance exempt pesticides on Food Crops right up to harvest. The use of Pro-Film on tolerance exempt pesticides close to harvest may result in visible residues on crops that may render them unsalable. If this becomes a problem, the rate of Pro-Film should be reduced or stopped altogether.
* This is a guide only. The actual length of extension may vary depending on the type of pesticide used and climatic conditions after application.		

**NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

**GENERAL INSTRUCTIONS**

To convert rates per hectare to rates per 100 Litres of water – use the following equation:

mL of Pro-Film per 100 L of water =	Pro-Film Rate per Hectare required (mL/ha) X 100
	Water rate Applied (Litres/ha)

Eg. Pro-Film as an extender @ 1200 mL/ha with 500 Litres of water applied per hectare.

1200 X 100	= 240 mL of Pro-Film per 100 Litres of tank mix
500	

Add Pro-Film to the spray tank as it is filling, with the agitator running. To ensure good emulsification of this product, it is advisable to pre mix Pro-Film with water before adding to the spray tank. Add Pro-Film to the spray tank as the last ingredient. Rinse tank, lines and nozzles, immediately after spraying, with water. After rinsing, there may still be a small amount of sticky residue in the tank. This will help to prevent rusting and corrosion. It will not clog nozzles when sprayer is next used. If spray happens to land on undesired surfaces, such as windows, cars, application equipment or others, it can be removed with soap and water, before the spray deposit is dry or with premium grade or white kerosene after the film has dried or set. To remove dried deposits from painted car surfaces, use standard tar remover products designed for use on painted car finishes.

Use this product in accordance with good agronomic practices, which include utilising proven spray equipment set for proper coverage. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT**

DO NOT contaminate streams, rivers or waterways (including ponds and drains) with this product or used containers.

**STORAGE AND DISPOSAL**

KEEP OUT OF REACH OF CHILDREN. Store in the closed original container in a cool well ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

**FIRST AID**

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

**MATERIAL SAFETY DATA SHEET**

Additional information is listed in the Material Safety Data Sheet (MSDS) which can be obtained from the supplier.

**CONDITIONS OF SALE:** Amgrow Pty Ltd shall not be liable for any loss injury damage or death whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale supply use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Amgrow's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Amgrow has any authority to add to or alter these conditions.

**GENERAL INFORMATION**

Pro-Film 904 is a sticking-extending agent designed to control the life of pesticides. It is compatible in the spray tank with Insecticides, Fungicides and Soluble Fertilizers.

- Forms a sticky elastic film which encapsulates and tenaciously holds the pesticide on the crop foliage. This protective film may reduce the effects of environmental degrading factors, which reduce the effectiveness of pesticide sprays.
- Will not foam, freeze or clog nozzles. It has been proven effective when applied by any aircraft or ground sprayer. It improves the initial pesticide deposit and allows excellent re-distribution of aircraft and concentrate sprayer deposits, to give complete coverage.
- Prevents rainfall and wind erosion of pesticides from the leaf surfaces. Pesticide volatilisation is minimised by protective film. Loss of pesticide deposit by the abrasive activity of leaves rubbing together is also prevented.

*Under most conditions, apply sprays containing PRO-FILM 904 at least one hour, during daylight, before anticipated rain. Sunlight for this time period is needed for the protective film to set.*
