

# Introducing HomeGuard® Blue

**The cost effective answer to  
Precision  
Termite Management**

## What is HomeGuard® Blue

HomeGuard® Blue is manufactured to the same strict standards set for all of the HomeGuard range of products. Coloured blue, it is a 250 micron termite moisture barrier, specially designed for cost effective perimeter cavity installations. HomeGuard® Blue can be used in combination with other quality HomeGuard products.

## Features of HomeGuard® Blue

- Proudly Australian made
- A proactive barrier system that kills, repels and physically stops termites
- APVMA registered and BCA approved
- Quick to install minimising joining and cutting
- A single sheet, non-leaching moisture barrier
- Non-sensitising and non scheduled
- Cost effective without compromising on quality
- Kind to the environment
- Designed to last the life of the building
- Backed by the HomeGuard Warranty\*

\*HomeGuard warranty is limited and conditions must be met for it to apply.  
Contact **FMC** on 1800 066 355 for full details.

## Questions and Answers

**Does Home Guard® Blue replace the damp proof course?**  
No! HomeGuard® Blue is not a damp proof course under AS 2870. Where a DPC is required, it should be installed separate to the HomeGuard® Blue.

**Is HomeGuard® Blue covered by FMC's warranty?**  
Yes! As long as the product is installed as per the registered label, the installation manual requirements and meets FMC's warranty terms and conditions.

**Where is HomeGuard® Blue best suited?**  
HomeGuard® Blue suits perimeter cavity installations where it can be installed at a very competitive price without compromise on quality or safety.

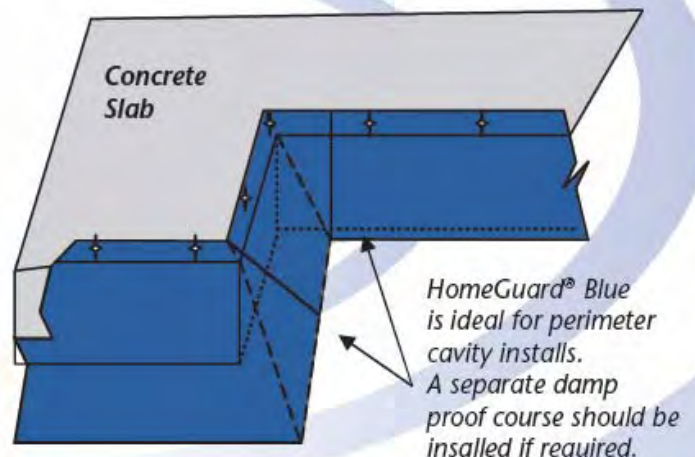

**Can I use HomeGuard® Blue to make penetration collars?**  
Yes, the registered label and installation manual both allow this use. However, for common penetration sizes, HomeGuard® collars are the most professional and time effective form of protection available.

**How long will HomeGuard® Blue last?**  
Like all HomeGuard® products, HomeGuard® Blue uses advanced impregnation technology that locks the termiticide into the sheet for the design life of the building. It does not need topping up or recharging.

## Installation of HomeGuard® Blue in the perimeter cavity

HomeGuard® Blue is ideal for perimeter cavity installs. A separate damp proof course should be installed if required.
